

Seriously injured after tripping over a fiber optic cable

Overview

Construction workers who trip over cords can fall from heights or into dangerous machinery. Workers often staple cords to cubicle walls, which damages insulation and creates shock risks. On July 9, 2024, an employee and a coworker working as repair technicians for a telecommunication company were installing fiber optic cables from a power pole to a residence. While attempting to get the fiber optic cable across a small patch of woods, the cable crossed over a. Common injuries: Bruises, broken bones, concussions, and even spinal or brain injuries can result from tripping over exposed cables or wires. Exposed wires or cables are an obvious hazard that any property owner should deal with before they can harm a guest or customer. The incident happened around 11 a. near a home at the 9200 block of Oak Ledge. My neighbor unplugged my.
