

Should I install fiber optic cables at home

Overview

In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. "Fiber to the home" describes the use of fiber optic cable to deliver broadband internet from a central location directly to private residences. Fiber to the home is one of many. Running copper Ethernet cables and coax cables outdoors can put your entire home or office network at risk for power surges from lightning strikes. In many cases, this can instantly destroy all. The process involves a combination of national infrastructure, local engineering, and property-level setup. This DIY effort is undertaken to maximize performance, improve aesthetics, or relocate the Optical Network Terminal (ONT) to a.
