OM3 Fiber Patch Cable Family

## Smart type of light meter for Canadian LAN use

Smart Meters are digital meters that will communicate energy use information between the meter at your home or business and sends it to your local distribution company.

LINK-PP supports the development of Ethernet-based and fiber-enabled smart metering systems with a complete range of RJ45 magnetic connectors, LAN magnetics, and SFP-compatible optical interfaces.

Smart meters are digital electricity meters that are able to measure how much electricity is used and when it is used. Smart meters then store and send this data over a wireless network to a central ...

Fluke, Megger, Crystal, Ralston, Mitutoyo, Defelsko, Proto, Alkitronic and more! Buy Online or Call Us Today!

Canadian smart meter standards define how revenue-grade multi-tenant metering systems operate, are designed, deployed, and managed.

Discover our range of products in Smart Metering: EcoStruxure™ Grid Metering Operation.

We offer a variety of light meters including models that come with NIST-traceable calibration. Choose from general, LED (white, red and blue), and UV (ultraviolet) light meters.

When used with the Reed Smart Series App, it is a real-time data logger, provides a user-selectable sampling rate from 1 to 120 seconds, and allows you to connect, measure, and data log up to 6 ...
