Spectrum Splitter Testing

Do you want to use Spectrum splitter for internet & TV? Learn about the installation, pros and cons, and features of coaxial cable splitters for Spectrum!

Bought a Leviton 47693-16P 1x16 CATV Module and after numerous issues, Spectrum showed up and told me that the Leviton doesn't support the power of their signal. So now, here I am trying to find ...

I just noticed that the tech left a splitter connected to the coax line going to the modem. I remember he said he had to put that on because the signal was too strong.

Do not connect the antenna directly to the Spectrum powered splitter! The signal will not be enough to pickup many of the channels! Even with the spectrum boost on the splitter! The only...

Contact us to schedule an appointment for a technician visit or learn more about self-installing Spectrum Internet service. Find out more about using splitters with your Spectrum equipment.

If the signal strength is weak or there is no signal at all, test the other output ports on the splitter. Connect a shorter coaxial cable to each of the output ports, then connect and turn on a TV or ...

Wavelength-division multiplexers can be tricky to test because they require sources at a precise wavelength and spectral width, but otherwise the test procedures are similar to other passive ...

In my last column we examined the importance of scalar testing, definitions of various terms, equipment required, and examined waveforms of actual insertion loss and isolation measurements using a ...

When using a cable splitter with your ISP, make sure to test the internet speed and quality at each device to ensure it's working properly. You may need to adjust the splitter settings or reorder ...

Look for splitters with specifications covering 5-1000 MHz or 5-2300 MHz for future-proofing. Number of Ports: Select a splitter with only the necessary number of output ports. Unused ...
