

Swiss Co-packaged Photonics 25G

Swiss Co-packaged Photonics 25G

Join the Swiss PIC team for a 6 to 12 month internship or Master's project to help develop next-generation photonic packaging solutions. We're looking for motivated future engineers ready to take ...

CPO solutions by ASMPT enable high-speed data and energy-efficient Co-Packaged Optics packages—optimize electronics and photonics integration now.

Co-packaged optics (CPO) is a disruptive approach to increasing the interconnecting bandwidth density and energy efficiency by dramatically shortening the electrical link length through ...

Ansys Lumerical and Zemax toolsets provide the best-in-class solutions to simulate and design complete optical coupling systems for co-packaged optics and other integrated photonics applications.

At the recent IMAPS Onshoring Workshop, GlobalFoundries shared updates on its New York Advanced Packaging and Photonics Center—supported by New York State and the U.S. CHIPS Act. The facility...

Silicon photonics is now a well-established technology and market for optical transceivers. In 2021, more than 9 million silicon photonic transceivers were shipped for datacenters.

Swiss PIC AM-TTC center which supports industry with photonic integration services Initial financing 2023-2028 Supported by European leaders e.g. Tyndall, Phix, Ficontec Currently commencing ...

TSMC-SoIC face-to-face (F2F) technology for EIC and PIC bonding. A packaging war? Taiwan possesses a comprehensive and fully developed semiconductor manufacturing ecosystem. Taiwan ...

Co-packaged optics can help mitigate signal integrity and power consumption problems, both of which introduce new test issues. At the heart of a switch lies a specialized application-specific integrated ...
