

Switch sequence of the distribution box

Overview

Phase 3's Powersafe Sequential Mating Box controls the connection sequence of incoming / outgoing high current cable connections. The sequence ensures that the Earth connection is made first and disconnected last. With key (included) turn. A distribution board or distribution box is where the main power supply is distributed to multiple loads. And all the switching and protective devices are installed in the distribution box. It contains multiple circuit breakers and connects various electrical circuits to ensure the safe flow of electricity throughout the building.

Switch sequence of the distribution box
