

UK ODM Liquid-Cooled Switch 200G

UK ODM Liquid-Cooled Switch 200G

NADDOD's 800G/400G/200G immersion cooling transceivers, featuring advanced sealing technology and compatibility with industry-standard fluids, deliver efficient heat dissipation and reliable data ...

GB200 Cold Plate Key Features Cooling capacity : 2700W Compatible with DI Water/PG25 coolant Suitable for GB200 Superchip server and 1U chassis Uses UQD connectors and stainless steel ...

The two types of liquid cooling used on a large scale in the data center field are cold-plate and submerged liquid cooling. Other types such as spray cooling have not been deployed on a ...

To meet the increasing power needs of AI and high-performance computing (HPC), Global Switch's London campus now hosts four live cooling systems, designed in partnership with ...

The Q3450-LD liquid-cooling system features two parallel cooling loops operating concurrently. Liquid enters via two separate inlet ports and exits through two outlet ports.

Global Switch's London Liquid Cooling Suite is the only space of its kind in Europe where all five of the major liquid cooling technologies are available to experience live and in action, some for the very first ...

Despite the Bianca board, including two B200 GPUs, one Grace CPU, and two Connect-X NICs, will be liquid cooled, the front half of the GB200 compute tray and NVSwitch tray, where the ...

Liquid-to-air CDUs do not require a chilled water supply to provide liquid cooling to the rack, but rather provide an independent secondary fluid loop to the rack and reject heat to the data center.

Take steps now to modernize your facility and thermal management strategies for tomorrow's liquid-cooled switches. Meet with your Cisco team or partner to discuss how to design, ...

FS provides 200G Data Center Switches (Free & Fast Delivery, Expert Tech Support, Outstanding Warranties).
