

## UK OTN Router LPO

### Overview

A Router or Hub, often sent to you by your Service Provider, to enable your WiFi connection. An ONT (Optical Network Terminal) and its power supply, which is installed by Openreach. This should already be in your premises. If your Service Provider is supplying this, it should arrive in time for. If you are a fibre customer, it's likely you'll have an Openreach modem (or ONT) installed. OFNL uses Fibre to the Home (FTTH) to provide voice, ultrafast broadband and television services. Ensure the optical port on the ONT has the fibre- to connect to your router. If you do have Digital Voice, five.

## UK OTN Router LPO

If you have Digital Voice (Phoneline+) the router labelled Phone. If your telephone doesn't fit in this port, please use the Digital Voice adaptor
