

UK Tunnel Distribution Box Specifications

Overview

WE-POWER developed the TDLB to withstand harsh conditions in accordance with BS6164, which provides useful guidance on voltages, equipment enclosures, cabling, electrical protection and lighting systems to be used in tunnels. Step-up and step-down power transformers in ratings from 100VA to 250kVA and voltages from 12V to 3300V. What are you looking for?

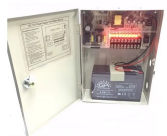

On large tunnel projects, Tunnel Boring. Cause each tunnel construction sites have their own electric specifications and designs, each type of distribution board are different. The company reserves the right to introduce modifications to the above de.

UK Tunnel Distribution Box Specifications

	<p>aluminium circular stranded copper Features An easy to install, fully insulated, factory fitted connection unit with a BSEN124 (Gra. B125) pavement access arrangement assembly. A re-enterrable and ...</p>
-----------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>The electricity power distribution system in the tunnel shall be suitable for the emergency response services equipment in accordance with the emergency plan for the tunnel.</p>
-----------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>Within each box are various MCBs rated up to 125A with variable or fixed RCD. Socket outlets are fitted at 125A, 63A and 32A rating and they all incorporate mechanical interlocking to prevent the insertion ...</p>
------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>Deep bore tunnels ect bury installation would cause unacceptable disruption. The method of excavation and tunnel design is largely dependent on the size of the tunnel equired and the type of ground in ...</p>
-------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

	<p>This document provides the general requirements for approvals, construction and testing of low voltage underground link boxes as used on the electricity distribution network (Network) owned by Electricity ...</p>
-------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

This document represents the minimum requirements and specifications for the installation of the electrical underground distribution systems fed from padmounted transformation, serving Secondary ...

These boxes are specially designed & certified for use in tunnels where fire and smoke considerations are para-mount. They are supplied with special silicone shrouds manufac-tured for high temperatures ...

Tunnel Distribution Assemblies are generally fitted with industrial socket outlets to BS EN 60309, which ensure quick, safe and reliable connections. Standard socket outlets are available in ratings of 16A, ...

With a deep attention on British Standard or EN regulation; TS designs board according to client specifications, such as design, IP standard, main component's brand and type of socket.

WE-POWER developed the TDLB to withstand harsh conditions in accordance with BS6164, which provides useful guidance on voltages, equipment enclosures, cabling, electrical protection and ...
