

What are the accessories for a straight-line optical cable

Overview

Common fiber optic accessories include connectors, adapters, patch panels, and strain relief hardware. number of over-head line applications for the transmission of information. We have been developing fittings for fib data transmission in such cables takes place via modulated. ADSS (All-Dielectric Self-Supported) is a kind of fiber optic cable that does not include any metal components for support, unlike conventional optics that need a separate messenger wire. These products are used across data centers, telecommunications networks, industrial facilities, and commercial infrastructure to ensure. Optical Extension Cable Adapter□The fiber optic audio male female adapter extends the audio interface of existing equipment, and it can also protect existing cables from repeated insertion and removal, reduce wear, and extend the service life of the equipment. Our inventory features high-performance components from industry-leading brands such as Panduit, Phoenix Contact, L-com and our brand RS PRO.
