What size square holes are best for network cabinet installation

Importance of Rack Screw Holes
Threaded Holes
Round Unthreaded Holes
Universal Square Rack Holes
Square rack holes are the most popular on new server racks today. They have square holes that are 3/8" by 3/8" and are typically on steel uprights that can be anywhere from .085" to .11" thick, which makes them strong enough to support virtually any equipment. This type of hole has made it much easier for manufacturers to develop "quick rails". ...See more on racksolutions
