

# Which company is Huawei's partner for its 1.6T optical module

## Overview

[Abu Dhabi, UAE, Dec 20, 2023] etisalat by e& and Huawei announced the completion earlier this month of the world's first 1.6Tbps per wavelength technology trial on an optical transport network, marking a major industry milestone in the ultra-high-speed optical industry. This technical achievement. HiSilicon and LightCounting jointly hosted a session titled "Towards 800G~1.6T". The event drew a crowd of attendees and featured experts from Baidu, Broadcom, HG Genuine, HiSilicon, Huawei, iFlytek. Recently, the PMD working group of International Photonics & Electronics Committee (IPEC) Technical Committee initiated the 1.6T optical module standards project. ("LIGENT") is a global full-stack provider of optical-communication and optical-interconnect solutions, delivering the most critical optical products for AI-computing networks.

## Which company is Huawei s partner for its 1.6T optical module

POET is a design and development company offering high-speed optical engines, light source products and custom optical modules to the artificial intelligence systems market and to hyperscale data centers.

Enter Ligent's 400G, 800G, and 1.6T pluggable transceivers, which are revolutionizing the landscape by providing scalable, high-bandwidth optical interconnects.

Etisalat by e& , the UAE's biggest telecoms operator, and China's Huawei Technologies said that they have successfully completed the trial of the world's first 1.6Tbps per wavelength ...

Lumentum is ramping its 1.6T DR8 TRO (Transmit-Retimed Optical) transceivers. The TRO architecture is a unique approach that sits between full DSP and LPO, offering power savings ...
