This Reference Manual spotlights the OPGW installation instructions required in the field. ZION offers detailed installation instructions on the proper techniques for installing OPGW cables.

Use only shielded cable. Temperatures at the cable entry can reach 80° C. Selection of cable must be appropriate for the ambient temperature range in which the product is used.

The document discusses methods for joining optical fibers, including fusion splicing and mechanical splicing. Proper preparation of the fiber ends is important for both methods.

Connect two (ribbon) optical fibers according to the prescribed method, the connector is snapped into the slot of the fusion splicing unit, and the remaining length should be coiled in the tray.
