

With 1577 optical power meter

With 1577 optical power meter

This optical power meter with separated wavelengths 1490/1550/1577nm are mainly used for the installation, test and maintenance of FTTH optical access network. When there are multiple ...

Price and other details may vary based on product size and color. Need help?

Jonard Tools XGS-1577 Passive Optical Network (PON) Power Meters are designed for accurate and simultaneous measurements of upstream and downstream PON wavelengths in optical networks. ...

The L-com FOTM-OPM-MCH Multi-channel Power Meter, optimized for PON (Passive Optical Networking) Applications. The L-com FOTM-OPM-MCH features Six (6) wavelengths, covering PON ...

With support for 1270 nm and 1310 nm upstream wavelengths, and 1490 nm, 1550 nm, and 1577 nm downstream wavelengths, this meter is ideal for EPON, BPON, GPON, XG-PON, and XGS-PON ...

With storage for up to 1,000 test results and a rugged, field-ready design powered by three AA batteries, the XGS-1577 delivers reliable performance wherever the job takes you.

The AFL FlowScout Downstream PON Power Meter is a versatile and reliable tool for measuring power levels in PON networks. It can automatically detect and simultaneously measure coexistent ...

XGS-1577 is a XGSPON meter. It is a high-performance testing tool designed for accurate and simultaneous measurements of upstream and downstream PON wavelengths in optical networks.

Powered by three AA batteries with up to 90 hours of runtime, this meter is engineered for portability and endurance. With low insertion loss and minimal measurement uncertainty, the XGS ...

The XGS-1577 XGSPON Meter is a high-performance testing tool designed for accurate and simultaneous measurements of upstream and d 1310 nm upstream wavelengths, and 1490 nm, 1550 ...
